tonković winery **photoshooting**

Tonković Winery is a family-owned winery located in northern Serbia, known for reviving Kadarka, a historic wine deeply rooted in the region's winemaking tradition

Tonković Winery had no consistent visual direction and their materials reflected that. On top of that, they were working with a very limited set of photos, not enough to cover the range of promotional and marketing materials a winery typically needs.

To establish the visual direction, we created a range of design options for the brochure and menu and worked through them with the client until we landed on the right approach. After that it was content, image editing, and print preparation. We also did an on-site shoot covering the staff, the winery, and the products, after which we handled all the post-production ourselves to make sure the final photos were polished and ready for use.

room 211 **social media (our profiles)**

ROOM 211 is a creative studio based in Belgrade, Serbia. We work with ambitious businesses and organizations to help them build their brand identity, marketing strategies, social media presence, digital product design, and any other type of custom creative work they need in order to stand out and make a real impact in their industry.

ROOM 211
has a new website
room211.studio

Cleaner. Faster. Easier to explore.

tribalion event content creation

Tribalion is an OCR race held on Mount Tara, taking its participants through mud, water and steep mountain terrain, with a variety of obstacles including walls, climbing, crawling and carrying heavy loads.

Tribalton needed photo and video coverage of their event in order to capture the atmosphere, participants and key moments throughout the race. Beyond documenting the event, they also needed content that could be used across their social media channels.

We covered the event on-site, capturing both the race and the overall atmosphere. After the event, we selected and edited the footage into a series of social media assets, giving Tribalion a collection of content they could use to communicate the experience and keep the event present on their channels.
